

Product : Uni-EcoTreat

. . . combination of yucca and probiotics

Key Benefits :

- Uni-Ecotreat creates probiotic farming environment and speeds up the natural process of organic load / sludge degradation.
- Uni-Ecotreat contains the natural extract of Yucca schidegera. The extract contains two components steroidal saponins and glycol component that help in converting ammonia to non - toxic form.
- Uni-Ecotreat contain naturally occurring bacteria that are capable of producing high concentration of enzymes, having the ability to degrade organic matter.
- Uni-Ecotreat Probiotic organisms can consume a broad spectrum of pollutants, including surfactants, fats, sugars, starch, etc., while eliminating the formation of hydrogen sulphide.
- Uni-Ecotreat acts as a feed supplement by promoting the growth of healthy phyto / zoo plankton growth.
- Uni-Ecotreat is effective in high range of pH and salinity.
