

Product : Uni-Max

...Unique Blend of Probiotics, Vitamins & Enzymes.

Key Benefits :

UNI-MAX acidifies the gut of shrimp/fish and prevents the growth of pathogens like Clostridia, E.coli, Salmonella and Vibrio species. Streptococci.

UNI-MAX is capable of releasing enzymes like amylase, phytase, protease, lipase and cellulase and beta gluconase in substantial quantities to improve digestion and assimilation of nutrients.

UNI-MAX converts unavailable phosphorous (present in the feed in the form of phytates) into available phosphorous to enable digestion/assimilation.

UNI-MAX helps in digestion of fiber present in the feed to maintain proper collagen synthesis to maintain firm cell membrane, prevent loose shell/white feces and promote firm muscle growth.

UNI-MAX optimize the immune system by increasing their resistance to diseases.

UNI-MAX Vitamins prevents the metabolic disorders, Vitamin C improve weight gain and helps to fight against stress.

UNI-MAX improves Feed Conversion Ratio.

UNI-MAX used as feed supplement.
