

# Industrial Wastewater Treatment

## 209AC

### Biological Accelerator

**bactus 209AC** is a specific formulation that contains easily amenable carbon source for microbes. The formulation is also enriched with micro nutrients and trace elements required for the growth of bacteria.

### INDUSTRIES

**Any Biological Treatment Plant that requires enriched carbon source for biostimulation and bioaugmentation.**

### BENEFITS

- Helps biostimulation and bioaugmentation of treatment system with less organic load.
- Accelerates the growth by acting as a catalyst for the acclimatization.
- Rapid Biostimulation helps the microbial growth to function with high metabolic activity.
- It is the safest and most cost effective way to improve treatment efficiency.

### TYPICAL PROPERTIES

Appearance	Liquid
Shelf-life	2 years from the date of manufacturing.

### PACKAGING

**bactus 209AC** is available in  
50 Kg plastic container

### PERFORMANCE PROPERTIES

Effective pH range: 5.2-9.5,  
Effective Temperature Range: 5-55°C,

### STORAGE & HANDLING

Storage: Store in a cool, dry place  
Handling: Wash hands thoroughly with warm,  
soapy water after handling
